Bachelor of Seconday Education	2013 - 2017 Lmro

PROJECTS

Blog App

- Developed and designed a blog app with authenticating, utilizing NodeJs by storing all the data on MongoDB, And the client-side ejs, while implementing MVC.
- Improved user experience during app by using things like dark mode to improve the usability while minimizing the code for web performance.

E-commerce App

- Developed an e-commerce app, and built API for providing all the products, utilizing NodeJs on the server-side, and the client-side with Vue via an API.
- Implemented design features, state management, router, and CSS methodology like BEM in SASS.

Game App

- Created a classic game App to enable users to play rock-paper-scissors or rock-lizard-Spock in NextJS, and save names for records by saving them in MongoDB.
- Implemented good practices, state management with redux, and test the code with unit testing
